

Michael Fray

Developer / Tech enthusiast / Studying .Net

michaelfray1@gmail.com | (+46) 700283286

Summary

A developer with a background in social work who transitioned into tech two years ago. Since then, I've been building a strong foundation in computer science and programming, with a focus on solving real-world problems. I have hands-on experience with JavaScript and modern frameworks such as React and Next.js, and I am currently expanding my skills by studying C# and .NET. Through my internship in a software development team, I've gained practical experience working in a collaborative environment, and I'm now ready to take the next step in my development career.

Experience

Developer / Intern Wacoco HB, Stockholm, Sweden

January 2025 – May 2025

During my internship at Wacoco HB, I worked as part of a small development team, contributing to the design and implementation of web applications. I collaborated with developers and stakeholders to translate requirements into functional features, primarily using JavaScript and modern frontend frameworks. The role gave me hands-on experience with real-world development workflows, including version control, code reviews, and agile practices. I also focused on writing clean, maintainable code and improving user experience through iterative feedback. I actively used AI tools and tried to find best practices in using them as more of a companion rather than full autopilot agents.

Key responsibilities

- Developed and maintained frontend features using JavaScript, React, and Next.js
- Collaborated with team members in an agile environment (daily standups, sprint planning)
- Translated business requirements into technical solutions
- Participated in code reviews and followed best practices for clean code
- Used Git for version control and team collaboration

Key achievements:

- Implemented reusable UI components that improved development efficiency
- Contributed to improving page performance and responsiveness
- Delivered features within sprint timelines in collaboration with the team
- Gained practical experience working in a production-level codebase

Tech Stack: React, TypeScript, Node.js, Next.js

Technical Skills

Frontend: JavaScript, TypeScript, React, Next.js, HTML, CSS, C# .Net

Backend: Node.js, Express.js, RESTful APIs, Databases incl. MongoDB, SQL

DevOps: Docker, CI/CD

Tools: Storybook, Vite, Axios, Tailwindcss

Soft Skills

Cross-functional Collaboration, Communication, Problem Solving, Coaching, Continuous Learning, Ownership & Accountability

Selected Projects

- [Movie Seat Booking](#) – Built a web application using React and a mock REST API (JSON Server). Implemented dynamic seat selection, state management, booking validation, and CRUD functionality for movie management.

[Wacoco UI Project](#) - Developing a scalable frontend architecture using React, Storybook, and Vite. Built reusable UI components and templates, organized component structure, and implemented designs from Figma using modular CSS.

[CoreFitness \(ASP.NET- Project\)](#) Developing a web application using ASP.NET MVC. Implementing features such as user authentication, booking system, and database integration.

Courses

- [Programming with C# .Net course](#) – at Nackademin —
- [Programming with ASP.net](#) – at Nackademin –
- [Frontend Development \(1 & 2\)](#) – at Nackademin
- [Databases](#) – at Nackademin
